NUANCE

Dragon Medical Practice Edition:
The front-end, real-time speech recognition solution

Challenge
How can clinicians efficiently document patient care in their own words, spending less time typing or clicking inside their EHR?

Solution
By using Dragon Medical Practice Edition, clinicians can efficiently navigate and dictate medical decision-making and treatment plans directly into a patient's electronic record. Dragon Medical Practice Edition is the perfect desktop front-end speech recognition solution for the healthcare professional, from medical practices to primary care facilities and departmental working groups – easy to deploy, rich in end-user features and boosting information capturing directly in departmental information systems or EHRs.

Using Dragon Medical Practice Edition ensures clinicians document care 'in their own words', and, therefore, more completely. They also save additional time by using customised macros to enter frequently-dictated text with a single voice command.

Overall, Dragon Medical solutions dramatically reduce the time clinicians spend documenting care – 30 minutes or more a day, according to a number of studies.

Key features

‣ **More accurate than ever** Significant accuracy improvements over previous versions and over non-medical Dragon.

‣ **Recognition speed** Dragon Medical Practice Edition improves recognition response time significantly.

‣ **Medical vocabularies** Includes vocabularies for medical specialties and subspecialties.

‣ **Transparent dictation window**
A transparent screen makes dictating into Hidden Mode easy while viewing lab results, images and flow sheets.

‣ **Dragon medical template library**
Includes library of macros for standard notes and 'medical normals' by body system.

‣ **Smart configuration** Automatically detects hardware resources. Its state-of-the-art technology takes advantage of advances in hardware and runs in multiple threads automatically when multi-core hardware is detected, for better recognition performance.

‣ **Recognition analytics** Automatically detects poor audio input and alerts the user, offering advice to remedy the situation and improve accuracy.

‣ **Flexible input** Use your iPhone® or Android® devices for speech input!

‣ **Application support** Dragon Medical Practice Edition supports Office 2013®, Internet Explorer 10®, and Gmail®, Hotmail®, and Outlook.com® by introducing Rich Internet Application support.

Key benefits

‣ Dictate faster and more accurately than ever before
‣ Dictate anywhere in your EHR and accelerate adoption
‣ Dramatically reduce transcription costs
‣ Save clinicians 30 minutes or more a day
‣ Spend more time with patients
‣ Dictate in clinician's own words
‣ Support higher level of reimbursement
‣ Improve doctor satisfaction

The right solution

Dragon Medical Practice Edition is the right solution for your clinical setting, as compared with non-medical Dragon offerings.

Dragon Medical: A Leading Solution for Practicing Clinicians

The Dragon Medical solutions family is the leading speech recognition solution in healthcare today. Dragon Medical technology has been chosen by more than 180,000 physicians worldwide to document clinical records and dictate correspondence, making it the most widely used speech recognition solution for physicians. Clinicians may use speech commands to navigate and dictate clinical notes in most commercially available EHRs in a Windows environment.

About Nuance Healthcare

Nuance Healthcare, a division of Nuance Communications, gives doctors access to voice recognition technology anywhere, any time, on any device. Nuance empowers healthcare provider organisations and individual doctors to accurately capture and transform the patient story into meaningful, actionable information in 22 languages. Today, over 10,000 care giver organisations and 450,000 users worldwide trust nuance voice recognition technology to deliver higher quality care, improve financial performance and enhance compliance efforts. Discover how nuance Healthcare's wide range of voice recognition solutions and services can increase clinician satisfaction and EHR adoption at www.nuance.co.uk/healthcare.
